

## Benefits of CGS

- Increased performance
- Improved fuel economy
- Improved sound
- Quiet inside, throaty sound outside
- Factory fitment
- Stylish appearance
- Simple installation
- 50-state street legal
- Lifetime warranty

### HPB // HIGH PERFORMANCE BREATHING

CGS Motorsports air intake and cat-back exhaust systems together maximize the performance of your vehicle. Don't just reveal half of your vehicles potential when you could have it all. By adding CGS' complete line of aftermarket products you will be doing just that. Together, our performance systems maximize your engine's breathing by fully enhancing the air intake and exhaust flow, delivering the full capability of your vehicle. Each system is tested, tried and guaranteed to increase horsepower and torque. CGS recommends that you LET IT BREATHE.

CGS Motorsports has been helping automotive enthusiasts "BREATHE" since 1995. We are committed to offering the highest quality products at competitive prices. For over a decade, we have been adding sport to the motors of thousands of trucks and SUV's creating extra horsepower and better fuel economy.

In addition to the exhaust system there is more power to be gained. That's when we developed an air intake line that truly helps your engine breathe. Just like the human body, a vehicle must inhale so that it can exhale - Let it BREATHE.

By installing our systems you are allowing your vehicle to use its full potential. Our components are superior by design and engineering, using the highest quality materials, effective research and most precise design.

Our products are unmatched for their image as well as performance. We don't compromise on quality or craftsmanship when creating your vehicles essential performance products.

## COLD AIR INTAKE SYSTEMS

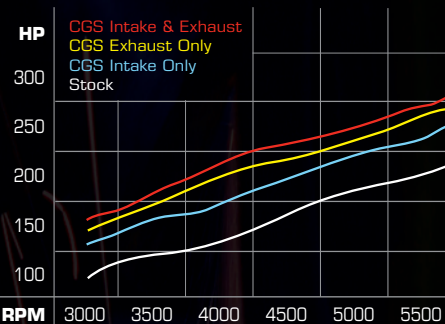

**INHALE** CGS Intake Systems are engineered specific to each application to ensure a perfect fit. Our air intake systems aren't just ejected from a plastic mold; they are **handcrafted and sculptured from steel**, into virtually an art form.

CGS intakes give you the best of both worlds, your not only gaining horsepower, but you get better gas mileage. Our systems **add 1-2 miles per gallon**, as well as up to **18 horsepower**. The tubing is CNC mandrel bent and powder coated to provide style and durability.

CGS intakes offer superior filtration and maximum air flow. **CGS filters are washable and reusable** to give you control of the air your engine breathes.

These top-of-the-line intake systems offer easy **bolt-on installation** and a complete replacement **lifetime warranty** at an unbeatable price. CGS performance products are **50-state street legal**.

## PERFORMANCE CAT-BACK EXHAUST SYSTEMS

**POWER**  
**SOUND**  
**TORQUE**

**EXHALE** CGS is proud to introduce the **first hybrid cat-back exhaust**, guaranteed to outlast and outperform every other aluminized cat-back system on the market. CGS uses 100% **all-welded polished T-304 stainless steel high-flow muffler**, combined with **mandrel-bent aluminized seamless tubing**, and a **polished T-304 stainless steel clampless tip**.

The result: A great looking system with powerful sound, performance increases **up to 30 horsepower**, **up to 30 ft-lb torque**, and **adds up to 2 miles per gallon** increase in fuel efficiency.

These top-of-the-line exhaust systems offer easy **bolt-on installation** and a complete replacement **lifetime warranty** at an unbeatable price. CGS performance products are **50-state street legal**.
